

Impaired Driving Regina

Impaired Driving Regina - Amongst the most valuable assets which a business could have are patents. It is imperative that a patent portfolio is maintained and secured so as to ensure that an organization would continue to expand and succeed.

As among the largest and respective patent teams in the nation, we have broad experience in procuring patents and protecting them. Additionally, we help clients leverage patent matters with skill and efficiency.

We have a lot of various experts in our team, including patent agents, technical consultants and patent lawyers. Many of the consultants we have at our disposal have either a scientific or engineering Ph.D. Some examples of the fields wherein we have knowledge are chemical, aerospace, civil, biochemical, electrical, computer science, metallurgy and material science, industrial, biochemistry, mechanical, biomechanics, biotechnology, food science, chemistry, endocrinology, genetics, immunology, life sciences, neuropsychology, microbiology, neurophysiology, molecular/cellular biology, organic chemistry, pharmacology, physics, toxicology, and physiology.

The combination of acute business acumen along with our wide variety of technical skills allows us to provide a comprehensive understanding of an assortment of technical complexities. Our experience and expertise allows our clients to achieve optimal patent asset value. We are there to provide valuable suggestion and help about the negotiation of technology transfer and licensing agreements as well as the enforcement of intellectual property rights.
