

Regina Patent Lawyers

Regina Patent Lawyers - Our company leads the way in intellectual property law. We have an Intellectual Property (IP) Group with a wide range of technological expertise specializing in the use, exploitation, development and protection of intellectual property and information technology.

Our experts are knowledgeable at patent applications and trade-mark applications and registrations. Our members have assisted with many industrial design registrations and applications.

To give useful legal recommendation concerning several complex IT concerns, a wide range of scientific knowledge and a legal background is considered necessary. Our professionals have made the deepest research in these sciences. Some have engineering degrees while others have graduate degrees in the areas of chemistry, physics, biotechnology, electronics, engineering physics, and electrical engineering. Among our group are members with doctoral degrees in analytical chemistry, nutrition and metabolism, applied chemistry, genetics, plant biogenetics, oncology and telecommunications. Advanced scientific backgrounds together with considerable skill at the bench equip our scientific experts with excellent expertise and skills.

The Industry

Nowadays, intangible property is the most valuable asset of several research organizations and businesses. Obtaining effective and cost-effective control and protection of intellectual property is crucial in a knowledge-driven economy. Cultural industries, technology and telecommunications are essential to the nation's economic growth and health. In order to ensure continued economic success, industries should have a well-developed intellectual property strategy.

As the trend to protect research results previous to public dissemination grows, access to the rights of others through cross-licensing or licensing-in is a primary concern. Flexibility is hence in a position in intellectual property rights to serve the dual purpose of providing an asset used to add revenues through licensing and to secure a niche market. A start-up or research-oriented organization can achieve substantial advantages by combining intellectual property assets through cross-licensing with those of a large worldwide business.

Protecting Intangible Assets

For lots of businesses in today's competitive climate, intangible assets such as brands, trade secrets, and goodwill are usually at the heart of commercial success. Hence, protecting intangible assets, which can consist of a significant portion of their value, is an essential approach to business.

Inter-disciplinary Approach

Our inter-disciplinary approach allows us to provide various services. We are well positioned to provide knowledgeable and up-to-date advice both to businesses in the area of technology and to those affected only incidentally by new technological developments.

To give our clients the best service possible, we work very closely along with professionals in the areas of banking; capital markets; human resources; tax, employment law, litigation; and mergers and acquisitions. Our regular participation in client specific teams guarantees that our clients have the legal and scientific support required for complicated intellectual property protection and management issues, and commercial transactions, consisting of the establishment of strategic alliances, outsourcing agreements, and initial public offerings in biotechnology, telecommunications as well as other technology sectors.

Client Focus

Your input is appreciated and recognized based on your knowledge in your field of business and value. Your confidence in your own business strategy helps us to formulate timely and cost effective intellectual property risk assessment and advice.

To improve our working relationship, we hold regular visits with you within your offices. We could discuss based on your international marketing strategy, the strategic development of global and national intellectual property portfolios. This provides a strong working relationship as well as a chance to be able to maintain and build a good understanding of your business.

There is considerable importance in keeping up to date with regards to expertise and knowledge in the rapidly changing area of intellectual property. Our group's continuing education program consists of participation and attendance at worldwide conferences, and with international, local and national organizations working within varied fields of intellectual property and information technology. We maintain an extensive worldwide network of foreign connections in order to assist our clients who need intellectual property protection outside our national borders.

Your Benefit
